Civil Engineer

Location: Jenks, OK

Description: Electrical Consultants, Inc., a leading power engineering consultant firm, has an immediate opening for a civil engineer in its Tulsa, OK (physically located in Jenks, OK) office. ECI specializes in engineering services to electric utilities (substation, protection, transmission) alternative energy systems, communication, oil/gas, mining and heavy industry.

Responsibilities include but are not limited to: designing pier and slab foundations for the support of structures and electrical equipment; designing tapered tubular, lattice and standard shaped steel for use in substation environments; designing grading and drainage plans; and interfacing with geotechnical engineers on requirements for engineering of civil portions of substations. Occasional travel may be required. A training period at one of ECI's other office locations will be required. Housing accommodation's during this training period will be paid for by ECI.

Minimum Requirements: BSCE or MSCE (emphasis in structural engineering preferred); excellent communication skills (verbal and written); ability to work in a team environment; attention to detail; and a willingness to meet fast-paced project schedules. **Successful applicant must not require immigration sponsorship now or in the future.** Successful applicant may be subject to client mandated drug/alcohol testing and background screening. Successful applicant must meet ECI's auto insurance carrier requirements.

Salary commensurate with experience and education. Benefits include:

- Medical, dental and vision insurance
- Flexible spending account
- Health savings account
- Life insurance
- Disability insurance
- 401(k), profit sharing and employee stock ownership plan
- Paid vacation, personal days and holidays
- Continued professional education reimbursement

Electrical Consultants, Inc. (ECI) employs over 450 engineers, designers, project managers, surveyors, ROW agents, environmental planners, construction professionals and support staff in 15 offices across the U.S. The firm has 30 years of experience in the planning, engineering and construction of a wide range of power delivery projects including substations, transmission lines, distribution systems, communication systems and industrial facilities.
