Electrical Field Test Engineer

Location: Billings, MT; Columbus, OH; Denver, CO; Madison, WI

Description: EPC Services Company (EPCS) has immediate openings for medium and high voltage electrical field test engineers. The successful candidates will join a team that performs testing and maintenance on medium and high voltage systems.

Responsibilities include electrical acceptance and maintenance testing of medium and high voltage apparatus as well as all aspects of AC and DC control circuit verification. Additional responsibilities include participation in all EPCS and client safety and testing training programs. The successful candidates will assist with testing of power transformers, medium and high voltage circuit breakers, instrument transformers, switches, reactors, capacitor banks, grounding systems, switchgear and protective relays and control systems. As abilities grow, the successful candidates will prepare quotes for testing work and will write formal test reports for clients. The successful candidates will be responsible for maintaining equipment and shipping and receiving equipment. Travel is required throughout the US with some potential for foreign travel.

Minimum Requirements: BSEE or EET degree with preferred emphasis in power systems; 3+ years of testing and maintenance on medium and high voltage systems experience required. EPCS would consider letting an individual work remotely if they have extensive experience in this field. This position is subject to client mandated drug and background checking. Successful applicants are subject to EPCS's auto insurance carrier requirements. **Successful applicants must not require immigration sponsorship now or in the future.**

Salary commensurate with experience and education. Benefits include:

- Medical, dental and vision insurance
- Flexible spending account
- Health savings account
- Life insurance
- Disability insurance
- 401(k), profit sharing and employee stock ownership plan
- Paid vacation, personal days and holidays
- Continued professional education reimbursement

EPCS's testing group employs full time and part time employees. EPCS also manages turn-key electrical power system construction projects throughout the US. EPCS is a wholly owned subsidiary of Electrical Consultants, Inc. (ECI) who employs over 450 engineers, designers, project managers, surveyors, ROW agents, environmental planners, construction professionals and support staff in 15 offices across the U.S. ECI has 30 years' experience in the planning, engineering and construction of a wide range of power delivery projects including substations, transmission lines, distribution systems, communication systems and industrial facilities and EPCS has 15 years' of experience in the construction and testing of power systems.
